

- **Electro-mechanical Operation**
- **Galvanised Steel Structure**
- **Bottom of Load Detection**
- **Accurate and Reliable**
- **Automatic Control**
- **Low Maintenance**
- **Track Movement**

Automatic Function:

Yes

Ideal for Sampling:

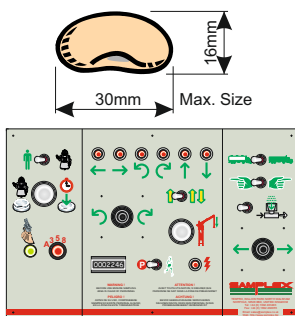

- ✓ Cereals
- ✓ Grain
- ✓ Seeds
- ✓ Pulses
- ✓ Animal Feed Pellets
- ✓ Dry Powders
- ✓ Milled Products

The **CS6000** truck probe is the latest addition to the Samplex range, It has the ability to sample a wide variety of products, with a maximum coverage of 35 Metres.

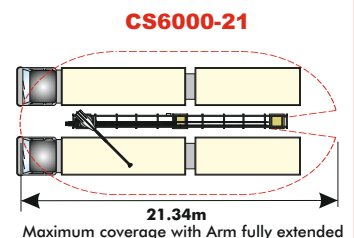

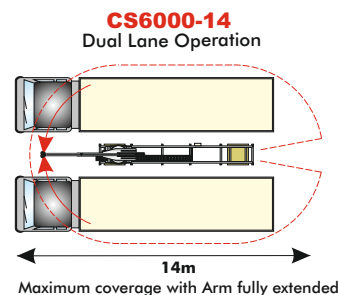

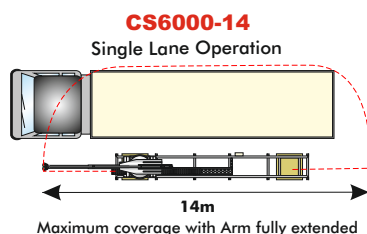

The complete range of Samplex Bulk Samplers are manufactured **exclusively** in the UK by TekPro Ltd, using durable materials, and are electro-mechanical, eliminating high pressure hydraulic hoses.

The 340° rotation and track movement allows for the variable sampling patterns required to meet ISO 24333:2009(E) standards, from tractor trailers to road trains.

Samples are taken under gravity and carried to a transparent reception chamber that can hold approximately 6.5kg of grain.

Joystick Control Unit

Ideal for different vehicles
